EDUCATION

Anjuman Institute of Technology and Management

Bachelor of Engineering in Computer Science and Engineering

Bhatkal, India

2023 – 2027

PROFESSIONAL SUMMARY

Fullstack Developer and Computer Science undergraduate specializing in building secure, end-to-end web applications. Expert in architecting high-performance RESTful APIs with Node.js and Django, integrated with modern Next.js frontends.

TECHNICAL SKILLS

Frontend: Next.js, React, Tailwind CSS, Framer Motion, Responsive UI Design

Backend: Node.js, Express.js, Django, Python, RESTful API Design, MVC Architecture

Databases & Security: MySQL, SQL, Relational Schema Design (3NF), JWT, AES-256

Programming: JavaScript, Python, C, C++

Tools: Git, GitHub, Postman, Linux, VS Code, Vercel

PROJECTS

Hospital Management System | *Node.js, Express.js, MySQL* [cite: 12]

- Architected a fullstack system with 12+ RESTful API endpoints, managing patient data, doctor scheduling, and billing modules[cite: 13].
- Engineered a 6-table normalized relational database schema (3NF) to eliminate data redundancy and ensure referential integrity[cite: 14].
- Implemented JWT-based authentication and role-based access control (RBAC) to secure protected patient routes[cite: 15].
- Optimized multi-table JOIN operations through strategic indexing, reducing query execution time[cite: 16].

Flappy Bird AI | *Python, Pygame*

- Developed an autonomous game system utilizing reinforcement learning to automate real-time gameplay.
- Optimized neural network training parameters to achieve high-performance autonomous navigation within 100+ generations.

Authenticated Quiz Platform | *Node.js, Express.js, MySQL* [cite: 19]

- Developed 10+ API endpoints supporting user authentication, quiz logic, scoring, and progress tracking[cite: 20].
- Managed transactional consistency across users and results through complex relational mappings[cite: 22].
- Integrated centralized error-handling middleware to ensure 100% consistent API error responses[cite: 23].

ACHIEVEMENTS

Top-15 Finalist, Sustainathon Hackathon: Outperformed competitors by delivering the "GreenHeart-AI" prototype within a strict 24-hour time-box.

Architectural Leadership: Led backend integration and database design for a cross-functional team under high-pressure constraints[cite: 31].
